

# ABC COMPANY TEAM MAP

Your Team Map shows where each of your team members falls on the *Circle of Styles™* and the natural compatibility between individuals' communication styles within the team.

- People who are close to each other on the Circle usually communicate easily with each other because they communicate in similar ways.
- If team members are farther apart on the Circle (but not directly opposite), they have to work harder to get along because their communication styles are different.
- People who are directly opposite each other on the wheel often have opposite ways of communicating, which can lead to disagreements.
